Special Issue

Strategies for the Deployment of Batteries of Short-Term Tests

edited by Herbert S. Rosenkranz

Foreword (MTR 04551)
Herbert S. Rosenkranz (U.S.A.) 1

ICPEMC — International Commission for Protection Against Environmental Mutagens and Carcinogens ICPEMC Publication No. 16
Testing for mutagens and carcinogens; the role of short-term genotoxicity assays (MTR 04516) 3

Short-term testing — are we looking at wrong endpoints? (MTR 04401)
C. Ramel (Sweden) 13

Genetic toxicology at the crossroads — a personal view on the deployment of short-term tests for predicting carcinogenicity (MTR 04402)
B.A. Bridges (Great Britain) 25

Successful use of short-term tests for academic purposes: Their use in identification of new environmental carcinogens with possible risk for humans (MTR 04399)
T. Sugimura (Japan) 33

Scientific and cost-effectiveness criteria in selecting batteries of short-term tests (MTR 04404)
G.S. Omenn and L.B. Lave (U.S.A.) 41

Reflections on the declining ability of the Salmonella assay to detect rodent carcinogens as positive (MTR 04436)
J. Ashby and I.F.H. Purchase (Great Britain) 51

Quantifying genotoxicity and non-genotoxicity (MTR 04481)
H.S. Rosenkranz and F.K. Ennever (U.S.A.) 59

Evolution of testing strategies for genetic toxicity (MTR 04406)
D. Brusick (U.S.A.) 69

Application of a cellular test battery in the decision point approach to carcinogen identification (MTR 04516)
G.M. Williams and J.H. Weisburger (U.S.A.) 79

Advantages of a combined testing protocol (CTP) with multiple endpoints: the reverse tier approach (MTR 04488)
M.T. Moslen and M.S. Legator (U.S.A.) 91

The ability of plant genotoxicity assays to predict carcinogenicity (MTR 04500)
F.K. Ennever, G. Andreano and H.S. Rosenkranz (U.S.A.) 99

The screening, diagnosis and evaluation of genotoxic agents with batteries of bacterial tests (MTR 04458)
P. Quillardet and M. Hofnung (France) 107

Genetic activity profiles and pattern recognition in test battery selection (MTR 04397)
M.D. Waters, H.F. Stack, J.R. Rabinowitz and N.E. Garrett (U.S.A.) 119

The genetic toxicology of Gene-Tox non-carcinogens (MTR 04398)
M.D. Waters, H.B. Bergman and S. Nesnow (U.S.A.) 139

Statistical analysis of Salmonella test data and comparison to results of animal cancer tests (MTR 04568)
J. McCann, L.S. Gold, L. Horn, R. McGill, T.E. Graedel and J. Kaldor (U.S.A.) 183

An analysis by chemical class of Salmonella mutagenicity tests as predictors of animal carcinogenicity (MTR 04501)
L.D. Claxton, A.G. Stead and D. Walsh (U.S.A.) 197

Predicting carcinogenicity with short-term tests: biological models and operational approaches (MTR 04507)
R. Benigni and A. Giuliani (Italy) 227

An analysis of the Gene-Tox Carcinogen Data Base (MTR 04405)
S. Nesnow and H. Bergman (U.S.A.) 237

0165-1218/88/$03.50 © 1988 Elsevier Science Publishers B.V. (Biomedical Division)

The significance of DNA and protein adducts in human biomonitoring studies (MTR 04494)
F.P. Perera (U.S.A.) 255
Application of new techniques for the detection of carcinogen adducts to human population monitoring (MTR 04486)
R.M. Santella (U.S.A.) 271
Utilization of the quantitative component of positive and negative results of short-term tests (MTR 04521)
S. Parodi, M. Taningher and L. Santi (Italy) 283
Use of computerized data listings and activity profiles of genetic and related effects in the review of 195 compounds (MTR 04472)
M.D. Waters, H.F. Stack, A.L. Brady, P.H.M. Lohman, L. Haroun and H. Vainio (U.S.A., The Netherlands, France, Finland) 295
Genetic toxicology: can we design predictive in vivo assays? (MTR 04525)
D. Clive (U.S.A.) 313
The use of short-term tests for the detection of genotoxic activity in body fluids and excreta (MTR 04491)
S. Venitt (Great Britain) 331
Short-term tests for teratogens (MTR 04532)
E.M. Faustman (U.S.A.) 355
The equivalence of assays within individual guidelines for the testing of the potential mutagenicity of chemicals: problems associated with battery selection (MTR 04487)
J.M. Parry (Great Britain) 385
The Japanese mutagenicity studies guidelines for pesticide registration (MTR 04400)
Y. Shirasu (Japan) 393
A proposed battery of tests for the initial evaluation of the mutagenic potential of medicinal and industrial chemicals (MTR 04403)
M. Ishidate Jr. (Japan) 397
The induction of numerical chromosome aberrations in human lymphocyte cultures and V79 Chinese hamster cells by diethyl sulfate (MTR 04578)
M. De Ferrari, S. Bonatti, V. Pisano, S. Viaggi and A. Abbondandolo (Italy) 409
A case report: A multiple end-point approach to evaluation of cytotoxicity and genotoxicity of erythrosine (FD and C Red No. 3) in a V79 hepatocyte-mediated mutation assay (MTR 04515)
C.G. Rogers, B.G. Boyes, T.I. Matula, C. Héroux-Metcalf and D.B. Clayson (Canada) 415
